Tom,

Many thanks for the pics of 0600.

They explain clearly why 42-50600 G in 857th Sq needed to have extensive sheet metal and fabric repairs carried out by 3 SAD Field Engineering at Ford, Sussex, 17 - 25 Sep 44. Now you know the name and location of the field. A useful piece of "knitting" but shall we ever complete the "garment"?

All the best,

Tom B.
