Tom,

The right undercarriage leg of B-24M-10 FO 44-50746 (858th Sq) collapsed on 10 Jun 45 at Harrington but the aircraft was repaired because it ended its career with RFC at Kingman, AZ, six months later.

Nothing else on my database but I guess that's the incident which prompted Item 1 on the DB.

Tom B.

Tom,

The DBs rarely have anything of significance, but once in a while have a bit of insight into daily life at the base. Having read DBs for 36yrs I know how often a statement in today's DB is related to a recent incident that practically everyone knows about. So.. take a look at item #1 on this one, any incidents in the 2 or 3 days before that you know of?

Thanks,
TE, ret.
